Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of formula I.

Group II, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of formula II.

Group III, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of formula III.

Group IV, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of formula IV.

Group V, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of Auto Inducer-2.

Group VI, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of Pro-AI-2.

Group VII, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of thiolactone having the sequence YSTCDFIM.

Group VIII claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of thiolactone having the sequence GVNACSSLF.

Group IX, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of thiolactone having the sequence YINCDFLL.

Group X, claim(s) 1-13, 17-29 and 32-33, drawn to monoclonal antibodies to molecules of thiolactone having the sequence YSTCYFIM.

Art Unit: 1645

NOTE: Applicants are required to point out which claims are encompassed by the elected invention.

The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Each of the Groups identified as Groups I-X has a separate primary, secondary or tertiary structure, which would require a separate search and consideration of each individual structure identified. Furthermore, a monoclonal antibody which binds to a molecule of Formula I, will not necessarily bind to any of Groups II-X.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1645

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Navarro whose telephone number is (571) 272-0861.
